BIO

Rai Julian is a contemporary artist based in Canggu, Indonesia, known for his uplifting narratives and profound visual poetry. Inspiration from a diverse range of artists.

Born in Bandung in 1994, Rai Julian left culinary school to devote himself to his lifelong dream of making contemporary art.

After brief stints in the university studying communication and behind drum kits in the underground music scene, he picked up his first brush during the pandemic and poured his heart and soul into his paintings.

Rai's art is heavily influenced by his multicultural friends and surroundings -- people with diverse backgrounds and unique stories. Through his art, Rai shares not only his personal experiences but also those of the people around him, making every piece truly special and reflective of his community. Rai's art could be described as a medley of uplifting narratives and profound visual poetry; often emulating the joy of everyday things.

Rai now lives and works in Canggu with his dog, holding a canvas in one hand and an arak bottle in another.
